Narrative Report Outline

To whom it may concern:

_____ is being cared for in our office for problems he/she is experiencing in the school setting. In order to assist me in providing medical care for him/her, I am requesting that you write a letter describing how he/she functions in the classroom setting. This may be brief, but should cover:

- A general picture of how you see this young person functioning in your classroom setting.
- How the young person functions doing individual work (e.g. ability to follow directions, get work done in a timely fashion, accuracy, etc.).
- How the young person functions doing group work (e.g. cooperation/sharing with peers, ability to stay on task).
- How the young person responds in group presentations (ability to attend, waiting their turn to speak, etc.).
- How the young person interacts one-on-one with instructors and peers.
- Other areas of concern you may have, and areas of strength demonstrated by the young person.

Thank you for taking the time to participate in his/her care.

Yours truly,

Pediatrics, P.C.
